**GENERAL ACCOUNTING PRINCIPLES FOR THE PREPARATION OF THE ANNUAL ACCOUNTS**

The financial statements have been prepared in accordance with the general provisions of Title 9, Book 2 of the Dutch Civil Code. As allowed in art.2:396 paragraph 6 of the Dutch Civil Code, the valuation of the assets and liabilities and the determination of the result is based on the principles for determination of the taxable profit, as meant in chapter II of the Corporate Income Tax Act 1969. The annual report and financial statements have been prepared on the historical cost basis, and incorporate the principal accounting policies set out below. They are presented in US Dollars. These financial statements will be submitted for consideration and approval at the forthcoming Annual Meeting of Shareholders of the Company.

**Assumption of continuity**

The Company has an equity deficit of USD 42,542,744 as of March 31, 2019. The result for 2018/2019 amounted to USD 2,065,861(loss). The deficit is fully funded by intercompany loans. The Company's ability to continue as a going concern is highly contingent on the willingness on the part of group companies to continue the said loans. The group companies confirmed their willingness to continue the loans. In view of this, the accounting policies used in these financial statements are based on the expectation that the Company will be able to continue as a going concern.

**Financial instruments**

Financial instruments are both primary financial instruments, such as receivables and payables, and financial derivatives. For the principles of primary financial instruments, reference is made to the treatment per Balance Sheet item.

The Company does not use derivatives.

**Translation of foreign currency**

The financial statements are presented in US dollar, which is the Company's functional and presentation currency, this based on the currency in which its main transactions are concluded.

Transactions in foreign currencies, transactions not in the functional currency of the transaction entity, are translated at the foreign exchange rate at transaction date.

Monetary assets and liabilities denominated in foreign currencies are translated at the foreign exchange rate prevailing at the Balance Sheet date. All differences are taken to the income statement. Share capital, which is denominated in Euro, is translated at the exchange rate prevailing at the Balance Sheet date; differences are taken to the Other reserves within shareholder's equity.

**Staff members**

During the Year 2018/2019 the Company had no employees, and hence incurred no wages, salaries or related social security charges, nor during the previous period.

**PRINCIPLES OF VALUATION OF ASSETS AND LIABILITIES****Impairment**

At each Balance Sheet date, the Company tests whether there are any indications of assets being subject to impairment. If any such indications exist, the recoverable amount of the asset is determined. If this proves to be impossible, the recoverable amount of the cash generating unit to which the asset belongs is identified. An asset is subject to impairment if its carrying amount exceeds its recoverable amount; the recoverable amount is the higher of an asset's fair value less costs to sell and value in use.

**Financial fixed assets**

Due to the international structure of the group and the use of the consolidation exemption of Article 408, Book 2 of the Dutch Civil Code, participations are recognized at cost. If an asset qualifies as impaired, it is measured at its impaired value; any write offs are disclosed in the income statement.

Receivables are valued at nominal value, unless disclosed differently. The receivables of group companies are included in financial fixed assets, except for maturities less than 12 months after Balance Sheet date. They are then included in the current assets.

#### **Current assets and accrued income**

Receivables are valued at nominal value. Any provisions for the risk of doubtful debts are deducted. These provisions are determined based on individual assessment of the receivables.

#### **Non-current liabilities**

Liabilities are valued at nominal value, unless disclosed differently.

#### **Long-term debts**

Borrowings are valued at nominal value. Payables to group companies are included in long-term debts, except for maturities less than 12 months after Balance Sheet date. They are included in the current liabilities.

### **PRINCIPLES FOR THE DETERMINATION OF THE RESULT**

#### **Principles for determination of the result**

Profit or loss is determined as the difference between the realizable value of services rendered, and the costs and other charges for the year. Revenues on transactions are recognized in the year in which they are realized.

#### **Financial income and expenses**

#### **Taxes**
