SOURCES OF INFORMATION

In connection with preparing this Valuation Report, we have received the following information from the Management:

- Unaudited carved out financials pertaining to the Target operations for FY 2017 and six month period ending 30 September 2017;
- Projected cash flows for the Target operations from 1 October 2017 to 31 March 2027 (Management Business Plan);
- Interviews and discussions with the Management to augment our knowledge of the Target operations;
- Certificate for replacement value of dark fibre dated 06 October 2017 issued by Protocol Valuers Private Limited provided to us by the Management;
- Other information, explanations and representations that were required and provided by the Management;
- For our analysis, we have relied on published and secondary sources of data, whether or not made available by Management. We have not independently verified the accuracy or timeliness of the same; and
- Such other analysis, review and enquires, as we considered necessary.

OVERVIEW OF TARGET OPERATIONS

As part of its operations, BAL owns and operates fiber network – both dark and lit, spanning over 200,000 (owned +IRU) km. As per Management, BAL began investing in fiber network in 2002 with majority of laying work happening between 2007 and 2009.

APPROACH - BASIS OF TRANSFER

The Proposed Transfer contemplates the transfer of Target operations to TNL pursuant to the Scheme.

There are several commonly used and accepted methods for determining the valuation of Target operations, which have been considered in the present case, to the extent relevant and applicable, including:

1. Replacement Cost method
2. Discounted Cash Flows method
3. Comparable Companies' Multiples and Transaction multiples method
4. Market Price method

It should be understood that the valuation of any business or its assets is inherently imprecise and is subject to certain uncertainties and contingencies, all of which are difficult to predict and are beyond our control. In performing our analysis, we made numerous assumptions with respect to industry performance and general business and economic conditions, many of which are beyond the control of the Company/Target operations. In addition, this valuation will fluctuate with changes in prevailing market conditions, the conditions and prospects, financial and otherwise, of the Target operations and other factors which generally influence the valuation of companies and their assets.

The application of any particular method of valuation depends on the purpose for which the valuation is done. Although different values may exist for different purposes, it cannot be too strongly emphasized that a Valuer can only arrive at one value for one purpose. Our choice of methodology of valuation has been arrived at using usual and conventional methodologies adopted for Proposed Transfer of a similar nature and our reasonable judgment, in an independent and bona fide manner based on our previous experience of assignments of a similar nature.

Replacement Cost Method

The asset based valuation technique is based on the value of the underlying net assets of the business, either on a book value basis or realizable value basis or replacement cost basis.

The Replacement cost estimates the value of an asset based on the current cost to purchase or replace that asset. The Replacement cost method reflects the idea that the fair value of an asset should not exceed the cost to obtain a substitute asset of comparable features and functionality. This method is based on the assumption that a prudent investor would pay no more for an asset than the amount for which he could replace or re-create an asset with similar utility.

Given that the Target operations are asset intensive, we have considered replacement cost method as primary method for our analysis. The estimate of replacement cost of the dark fibre based on optical fibre type, ducting cost, laying cost and right of way cost and technical life is as per the technical report by Protocol Valuers Private Limited, dated 6 October 2017. The details on total length and remaining useful is as provided by the Management.

Based on the information provide, net asset value of Target operations is computed as follows:

Computation of NAV (INR Million)	
Net equity value (book value) as at 30th Sept 2017	45,407
Net equity value (replacement cost) as at 30th Sept 2017	45,647
Difference	240

Note: 1) The estimate of current cost for laying of dark fibre and technical life is as per the technical report provided by Protocol Valuers Private Limited, dated 6 October 2017. The difference in book value and replacement value is on account of fair valuation of dark fibre assets.

2) We have not carried out any separate fair valuation of the individual assets and liabilities of Target operations

3) Details on total length of dark fibre and remaining useful life has been provided by Management

Discounted Cash Flows ("DCF") Method

Under the DCF method, the projected free cash flows to the firm are discounted at the weighted average cost of capital. The sum of the discounted value of such free cash flows is the value of the firm.

Using the DCF analysis involves determining the following:

Estimating future free cash flows:

Free cash flows are the cash flows expected to be generated by the company that are available to all providers of the company's capital – both debt and equity.

Appropriate discount rate to be applied to cash flows i.e. the cost of capital.

This discount rate, which is applied to the free cash flows, should reflect the opportunity cost to all the capital providers (namely shareholders and lenders), weighted by their relative contribution to the total capital of the company. The opportunity cost to the equity capital provider equals the rate of return the capital provider expects to earn on other investments of equivalent risk.

Management has provided us with the forecast free cash flow of Target operations. We must emphasize that realisations of free cash flow forecast will be dependent on the continuing validity of assumptions on which they are based. Our analysis, therefore, will not, and cannot be directed to providing any assurance about the achievability of the final projections. Since the financial forecasts relate to future, actual results are likely to be different from the projected results because events and circumstances do not occur as expected, and the differences may be material. We did not carry out any validation procedures or due diligence with respect to the information provided/ extracted or carry out any verification of the assets or comment on the achievability and reasonableness of the assumptions underlying the Management Business Plan, save for satisfying ourselves to the extent possible that they are consistent with other information provided to us in the course of this engagement.

After analysing the historical financial information and forecast business business, we concluded to assign nil weight to DCF method for the following reasons:

- Telecom sector in India is currently undergoing consolidation and hence, there could be potential loss of customers which may impact revenue assumptions considered in the Business Plan
- Contracts with customers carry indefeasible right to use and hence assessing renewal rates at the end of the contract period is also challenging.
- Further, the Target operations are asset intensive and its value is primarily from the underlying asset than its operations.
- In addition to above points, target operations is in a way B2B business with few customers, therefore, accurate forecasting of revenue over long term period may not be easy.

Given the above, we have we have not given any weightage to DCF method for our analysis.

Comparable Companies' Multiple (CCM) / Comparable Transactions Multiple method

Under this method, value of the Target operations is arrived at by using multiples derived from valuations of comparable companies, as manifest through stock market valuations of listed companies. This valuation is based on the principle that market valuations, taking place between informed buyers and informed sellers, incorporate all factors relevant to valuation. Relevant multiples need to be chosen carefully and adjusted for differences between the circumstances.

There are no public listed comparable company in India in similar business as the Target operations. We also referred to international companies to benchmark the Business with its international peers. However, based on discussion with Management, we understand that these companies are not comparable due to several reasons including difference in accounting policies relating to revenue recognition, depreciation and amortisation policy, different realisation, utilisation levels, size of operations, useful life of assets and business mix amongst others. Hence, we have not considered comparable companies multiples of our analysis.

Market Price Method

The market price of an equity share as quoted on a stock exchange is normally considered as the value of the equity shares of that company where such quotations are arising from the shares being regularly and freely traded in. Though BAL is a listed entity, the market price cannot be specifically attributed to the Target operations. Hence this method has not been considered for valuation of Target operations.

BASIS OF TRANSFER

The basis of transfer of the Target operations have to be determined after taking into consideration all the factors and methodologies mentioned hereinabove. We have assigned 100 per cent weight to the value arrived using the Replacement Cost method to arrive at the valuation for the Target operations.

Based on the factors discussed and outlined above, the valuation of the Target operations for the purpose of transfer is as follows:

Valuation Summary:

Net Equity Valuation Conclusion (INR Million)		
Method	Weightage	Value
Replacement cost method	100%	45,647
Concluded Net Equity Value		45,647

Note: Income approach and market approach are not applicable for the reasons mentioned under headers "Discounted Cash Flows ("DCF") Method", "Comparable Companies' Multiple (CCM) / Comparable Transactions Multiple method" and "Market Price Method" above.

Respectfully submitted.

ANNEXURE "A" TO THE INDEPENDENT AUDITOR'S REPORT

(Referred to in paragraph 1 (f) under 'Report on Other Legal and Regulatory Requirements' section of our report of even date)

Report on the Internal Financial Controls Over Financial Reporting under Clause (i) of Sub-section 3 of Section 143 of the Companies Act, 2013 ("the Act")

We have audited the internal financial controls over financial reporting of Bharti Airtel Limited ("the Company") as of March 31, 2018 in conjunction with our audit of the Standalone Financial Statements of the Company for the year ended on that date.

Management's Responsibility for Internal Financial Controls

The Company's management is responsible for establishing and maintaining internal financial controls based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India. These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to Company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Companies Act, 2013.

Auditor's Responsibility

Our responsibility is to express an opinion on the Company's internal financial controls over financial reporting based on our audit. We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting (the "Guidance Note") issued by the Institute of Chartered Accountants of India and the Standards on Auditing prescribed under Section 143(10) of the Companies Act, 2013, to the extent applicable to an audit of internal financial controls. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls over financial reporting was established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system over financial reporting and their operating effectiveness. Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgement, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company's internal financial controls system over financial reporting.

Meaning of Internal Financial Controls Over Financial Reporting

A company's internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorisations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorised acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Inherent Limitations of Internal Financial Controls Over Financial Reporting

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

In our opinion, to the best of our information and according to the explanations given to us the Company has, in all material respects, an adequate internal financial controls system over financial reporting and such internal financial controls over financial reporting were operating effectively as at March 31, 2018, based on the criteria for internal control over financial reporting established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India.

ANNEXURE "A" TO THE INDEPENDENT AUDITOR'S REPORT

(Referred to in paragraph (f) under 'Report on Other Legal and Regulatory Requirements' section of our report of even date)

Report on the Internal Financial Controls Over Financial Reporting under Clause (i) of Sub-section 3 of Section 143 of the Companies Act, 2013 ("the Act")

In conjunction with our audit of the consolidated financial statements of the Company as of and for the year ended March 31, 2018, we have audited the internal financial controls over financial reporting of Bharti Airtel Limited ("the Company") and its subsidiary companies, its associate companies and joint venture companies, which are companies incorporated in India, as of that date.

Management's Responsibility for Internal Financial Controls

The respective Board of Directors of the Company, its subsidiary companies, its associate companies and joint venture companies, which are companies incorporated in India, are responsible for establishing and maintaining internal financial controls based on the internal control over financial reporting criteria established by the respective Companies considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India. These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to the respective company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Companies Act, 2013.

Auditor's Responsibility

Our responsibility is to express an opinion on the internal financial controls over financial reporting of the Company, its subsidiary companies, its associate companies and its joint venture companies, which are companies incorporated in India, based on our audit. We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting (the "Guidance Note") issued by the Institute of Chartered Accountants of India and the Standards on Auditing, prescribed under Section 143(10) of the Companies Act, 2013, to the extent applicable to an audit of internal financial controls. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls over financial reporting was established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system over financial reporting and their operating effectiveness. Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness

of internal control based on the assessed risk. The procedures selected depend on the auditor's judgement, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained and the audit evidence obtained by the auditor of the joint venture company which is company incorporated in India, in terms of their report referred to in the Other Matters paragraph below, is sufficient and appropriate to provide a basis for our audit opinion on the internal financial controls system over financial reporting of the Company, its subsidiary companies, its associate companies and its joint venture companies, which are companies incorporated in India.

Meaning of Internal Financial Controls Over Financial Reporting

A company's internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorisations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorised acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Inherent Limitations of Internal Financial Controls Over Financial Reporting

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

In our opinion, to the best of our information and according to the explanations given to us and based on the consideration of the reports of the other auditors referred to in the Other Matters paragraph below the Company, its subsidiary companies, its associate companies and joint venture companies, which are companies incorporated in India, have, in all material respects, an adequate internal financial controls system over financial reporting and such internal financial controls over financial reporting were operating effectively as at March 31, 2018, based on the criteria for internal financial control over financial reporting established

by the respective companies considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India.

Other Matters

Our aforesaid report under Section 143(3)(i) of the Act on the adequacy and operating effectiveness of the internal financial controls over financial reporting in so far as it relates to joint venture, which is a company incorporated in India, is based solely on the corresponding report of the auditor of the joint venture company.

Our opinion is not modified in respect of the above matter.
