Quarterly report on the results for the first quarter ended June 30, 2010

Bharti Airtel Limited

(Incorporated as a public limited company on July 7, 1995 under the Companies Act, 1956) Bharti Crescent, 1, Nelson Mandela Road, Vasant Kunj, Phase II, New Delhi – 110 070, India

August 11, 2010

The financial statements included in this quarterly report fairly presents in all material respects the financial condition, results of operations, cash flows of the company as of, and for the periods presented in this report.

| Mobile Services | Telemedia Services | Enterprise Services | Digital TV Services |

Supplemental Disclosures

Safe Harbor: - Some information in this report may contain forward-looking statements. We have based these forwardlooking statements on our current beliefs, expectations and intentions as to facts, actions and events that will or may occur in the future. Such statements generally are identified by forward-looking words such as "believe," "plan," "anticipate," "continue," "estimate," "expect," "may," "will" or other similar words.

A forward-looking statement may include a statement of the assumptions or bases underlying the forward-looking statement. We have chosen these assumptions or bases in good faith, and we believe that they are reasonable in all material respects. However, we caution you that forwardlooking statements and assumed facts or bases almost always vary from actual results, and the differences between the results implied by the forward-looking statements and assumed facts or bases and actual results can be material, depending on the circumstances. You should also keep in mind that any forward-looking statement made by us in this report or elsewhere speaks only as of the date on which we made it. New risks and uncertainties come up from time to time, and it is impossible for us to predict these events or how they may affect us. We have no duty to, and do not intend to, update or revise the forwardlooking statements in this report after the date hereof. In light of these risks and uncertainties, any forward-looking statement made in this report or elsewhere may or may not occur and has to be understood and read along with this supplemental disclosure.

General Risk: - Investment in equity and equity related securities involve a degree of risk and investors should not invest any funds in this Company unless they can afford to take the risk of losing their investment. For taking an investment decision, investors must rely on their own examination of Bharti Airtel including the risks involved.

Convenience translation: - We publish our financial statements in Indian Rupees. All references herein to "Indian Rupees" and "Rs" are to Indian Rupees and all references herein to "US dollars" and "US\$" are to United States dollars. All translations from Indian Rupees to United States dollars were made (unless otherwise indicated) using the rate of Rs 46.60 = US \$1.00. Similarly all transactions from United States Dollars to Indian Rupees were made (unless otherwise stated) using the rate of US\$ 0.0215 = Re.1, being the RBI Reference rate as announced by the Reserve Bank of India on June 30, 2010. All amounts translated into United States dollars as described above are provided solely for the convenience of the reader, and no representation is made that the Indian Rupees or United States dollar amounts referred to herein could have been or could be converted into United States dollars or Indian Rupees respectively, as the case may be, at any particular rate, the above rates or at all. Any discrepancies in any table between totals and sums of the amounts listed are due to rounding off. Information contained on our website www.airtel.in is not part of this Quarterly Report.

Use of Certain Non-GAAP measures: - This result announcement contains certain information on the Company's results of operations and cash flows that have been derived from amounts calculated in accordance with International Financial Reporting Standards (IFRS), but are not in themselves IFRS measures. They should not be viewed in isolation as alternatives to the equivalent IFRS measures and should be read in conjunction with the equivalent IFRS measures. <u>Further, disclosures are also</u> provided under "Use of Non - GAAP financial information" on page 24

Others: In this report, the terms "we", "us", "our", "Bharti", or "the Company", unless otherwise specified or the context otherwise implies, refer to Bharti Airtel Limited ("Bharti Airtel") and its subsidiaries, Bharti Hexacom Limited ("Bharti Hexacom"), Bharti Airtel Services Limited, Bharti Infratel Limited (Bharti Infratel), Bharti Infratel Ventures Limited (subsidiary of Bharti Infratel Limited), Bharti Telemedia Limited (Bharti Telemedia), Bharti Airtel (USA) Limited, Bharti Airtel (UK) Limited, Bharti Airtel (Canada) Limited, Bharti Airtel (Hong Kong) Limited, Bharti Airtel Lanka (Private) Limited, Bharti Airtel (Singapore) Private Ltd, Network i2i Limited, Bharti Airtel Holdings (Singapore) Pte Limited, Bharti Infratel Lanka (Private) Limited (subsidiary of Bharti Airtel Lanka (Private) Limited), Bharti Airtel International (Netherlands) B.V., Bharti International (Singapore) Pte Ltd, Warid Telecom International Limited, Airtel M Commerce Services Limited, Bharti Airtel (Japan) Kabushiki Kaisha (subsidiary of Bharti Airtel Holdings (Singapore) Pte Ltd), Bharti Airtel (France) SAS (subsidiary of Bharti Airtel Holdings (Singapore) Pte Ltd), Bharti Airtel International (Mauritius) Limited, Bharti Airtel Africa B.V. 2. Underlying EBITDA Margin is computed before acquisition related costs, of Rs. 976 mn for the quarter ended March 31, 2010 and full year ended March 31, 2010, and of Rs. 982 mn for the quarter ended June 30, 2010.

Section 2

AN OVERVIEW

2.1 Introduction

We are one of world's leading providers of telecommunication services with presence in all the 22 licensed jurisdictions (also known as Telecom Circles) in India, and operations in Srilanka, Bangladesh and now in Africa. We served an aggregate of 183,371,520 customers as of June 30, 2010. We are the largest wireless service provider in India, based on the number of customers as of June 30, 2010. We offer an integrated suite of telecom solutions to our enterprise customers, in addition to providing long distance connectivity both nationally and internationally. We also offer Digital TV and IPTV Services. All these services are rendered under a unified brand "Airtel".

The company also deploys, owns and manages passive infrastructure pertaining to telecom operations under its subsidiary Bharti Infratel Limited. Bharti Infratel owns 42% of Indus Towers Limited. Bharti Infratel and Indus Towers are amongst top providers of passive infrastructure services in India.

2.2 Business Divisions

2.2.1 India & South Asia

Mobile Services (India & South Asia) - We offer mobile services using GSM technology in India, Sri Lanka and Bangladesh. We have the largest customer base in India in the wireless segment. We had 136,620,401 mobile customers with a customer market share (CMS) of 21.5% in India, as on June 30, 2010. We offer post-paid, pre-paid, roaming and value added services through our extensive sales and distribution channel covering 1.5 mn outlets. Our network is at present in 5,092 census towns and 440,023 non-census towns and villages in India, thus covering approximately 84.3% of the country's population.

Our national long distance infrastructure comprises of 129,244 Rkms of optical fibre providing a pan India reach.

Airtel Sri Lanka has approximately 1.4 mn customers, having a presence in 20 administrative districts of Sri Lanka. The company has launched 3.5G services in the major towns and has created a wide distribution network comprising over 21,000 retailers across the country. Airtel has recently expanded its network into the Eastern districts.

Airtel has started telecom operations in Bangladesh with the acquisition of a 70% stake in Warid Telecom, Bangladesh. It has over 2.5 mn customers, and offers mobile services across 64 districts of Bangladesh with a distribution network over 46,000 retailers across the country. Bangladesh, with a population of over 165 mn and teledensity of 36% is a very promising market for telecom services.

Telemedia Services – We provide broadband (DSL), data and telephone services (fixed line) in 88 cities with growing focus on the various data solutions for the Small & Medium Business (SMB) segment. We had 3,153,079 customers of which 42.6% were subscribing to broadband / internet services, as on June 30, 2010. Our product offerings in this segment include installation of fixed-line telephones providing local, national and international long distance voice connectivity and broadband Internet access through DSL.

We remain strongly committed to our focus on the SMB segment by providing a range of customized Telecom/IT solutions and aim to achieve revenue leadership in this rapidly growing segment of the ICT market. The strategy of our Telemedia Services business unit is to focus on cities with high revenue potential.

Enterprise Services - Enterprise Services is India's leading provider of communications services to large Enterprise and Carrier customers. We own a state of the art long distance network infrastructure, enabling us to provide connectivity services both within India and connecting India to the world.

We have made significant investments in new submarine cable systems, extending our reach all across the globe with over 225,000 Rkms, covering 50 countries across 5 Continents.

Enterprise Services delivers end to end telecom solutions to India's large corporates. We also serve as the single point of contact for all telecommunication needs for corporate customers in India by providing a full suite of communication services across data, voice, network integration, and managed services. We are regarded as the trusted communications partner to India's leading organizations, helping them to meet the challenges of growth.

We have also forayed into the Media & Entertainment industry with the launch of Digital Media Business. Digital Media enables a clear demand for secure digital distribution capability across multiple platforms and will help establish India as an innovation hub for global content and format delivery.

Digital TV Services - Airtel Digital TV with a base of over 3.2 mn customers continues to lead in new customer acquisition, acquiring 1 out of every 4 new customers joining the DTH platform. We continue to expand distribution, going beyond 9,000 towns and thousands of villages. To further widen the gap with incumbent technology, we have launched Airtel Digital TV recorder and High Definition (HD) set top boxes delivering superior customer experience. With recording of TV programs from mobile & web, we have launched our first truly integrated service converging all 3 platforms.

Passive Infrastructure Services – Bharti Infratel provides passive infrastructure services on a non-discriminatory basis to all telecom operators in India. Bharti Infratel deploys, owns and manages passive infrastructure in 11 circles of India. Infratel also holds 42% share in Indus Towers (a Joint Venture between Bharti Infratel, Vodafone and Idea Cellular). Indus operates in 15 circles (4 circles common with Infratel, 11 circles on exclusive basis).

Bharti Infratel has 31,196 towers in 11 circles, excluding the 35,254 towers in 11 circles for which the right of use has been assigned to Indus with effect from January 1, 2009. Indus Towers has a portfolio of 104,901 towers including the towers under right of use.

2.2.2 <u>Africa</u>

Mobile Services (Africa) - Bharti Airtel acquired the Africa operations of Zain Group excluding the Sudanese & Moroccan operations for a total enterprise value of US\$ 10.7 bn. This acquisition is in line with Bharti's strategy of expanding in emerging markets. Africa's population stands at 1 bn and is projected to grow at an annual average rate of 2.3% with a GDP growth rate of 3.1%. The population in 15 countries that we operate is around 459 mn with a mobile customer base of 178 mn representing a penetration of 38%. As at June 30, 2010 Airtel had 36.4 mn customers in these markets. The financial statements of African operations are consolidated in company results w.e.f. June 8, 2010.

Africa Others – It comprises of investment holding companies for Africa mobile operations.

2.3 Partners

Strategic Equity Partners - We have a strategic alliance with SingTel, which has enabled us to further enhance and expand our telecommunications networks in India to provide quality service to our customers. The investment made by SingTel in Bharti is one of their largest investments made in the world outside Singapore.

Equipment and Technology Partners - We continued to strengthen and build upon the unique outsourcing business models we have pioneered with our partners. These business models have enabled long term strategic relationships with global leaders who share our drive for co-creating innovative and tailor-made solutions for the markets we operate in.

Every year, in the first quarter, Airtel joins its key Partners to celebrate the year gone by, and renew our mutual

commitment to win in the marketplace as one extended team. This year's Partnership Meet had our top 100 partner organizations dialoging on what we must do to keep on winning. Also, as a reflection of the continued strength of our partnerships, we registered the highest partner satisfaction scores in our annual survey pointing to high levels of partner engagement and loyalty.

IBM is our strategic partner for all business and enterprise IT systems. Our path breaking contract with IBM caters to, among other things, technology evolution, scale, tariff changes and subscriber growth. As of quarter end, there were more than 90 hardware, software and service providers supporting us through IBM. Bearing testimony to the depth and breadth of this relationship is the IP Converged Core contract we just signed with IBM.

On the GSM/Wireless equipment side, we have partnered with Ericsson and Nokia Siemens for 2G/2.5G network in India, and with Huawei for the supply of 2G and 3G networks in Sri Lanka. We recently extended our agreement with Ericsson and Nokia Siemens Network (NSN) to cover the further expansion of our 2G/2.5G wireless network over the next two years. These equipment vendors also have the managed services contracts for the respective circles/country and take care of Network Operations towards flawless service delivery.

Alcatel Lucent (ALU) is our Wire-line Access Network Managed Services partner through a JV Company. They are also responsible for deployment of Fibre/Copper and service provisioning. ALU were recently introduced as the 3rd vendor in the Carrier Ethernet area.

IBM Daksh, Mphasis, Firstsource, Teleperformance, Aegis and HTMT are our call centre partners and provide an excellent customer experience through dedicated contact center operations. We work with globally renowned organizations such as OnMobile, Comviva, Yahoo, Google and Cellebrum among others to provide each of our customers with a unique experience in VAS like CRBT (caller ring back tone), Music on Demand, Email services and other Airtel Live applications. We have an alliance with RIM for selling Blackberry enterprise services and Blackberry internet services.

SECTION 3

Key Accounting Changes

3.1 Adoption of International Financial Reporting Standards (IFRS) w.e.f. April 1, 2010

The Ministry of Corporate Affairs (MCA) on 22nd January 2010 announced the approach and timelines for achieving Indian Accounting Standard convergence with IFRS. New converged Accounting Standards u/s 211(3C) of the Companies Act, 1956 will be issued and will be initially applicable to a specified class of companies. These companies include those listed in NIFTY 50, Sensex 30 or listed in overseas exchange or whose net worth exceeds Rs 10,000 mn are required to prepare the opening balance sheet in accordance with converged standards as of April 1, 2011.

The Securities and Exchange Board of India in its circular dated November 9, 2009 had permitted listed entities having subsidiaries to voluntarily submit the consolidated financial statements under IFRS standards effective April 1, 2010.

The company was following US GAAP standards and Indian GAAP for preparation of consolidated financial statements till Mar 31, 2010. The company in line with SEBI circular had elected to early adopt IFRS for the preparation of consolidated financial statements and accordingly has transitioned from existing Indian GAAP (being the base GAAP for transition) to IFRS effective April 1, 2009. The company will continue to follow existing Indian GAAP for standalone results.

3.2 Reclassification of Reporting Segments

Consequent to the adoption of IFRS w.e.f. April 1, 2010, the company has reviewed its operating segments disclosures. As per Para 5, IFRS 8 - "An operating segment is a component of an entity:

(a) that engages in business activities from which it may earn revenues and incur expenses (including revenues and expenses relating to transactions with other components of the same entity),

(b) whose operating results are regularly reviewed by the entity's chief operating decision maker to make decisions about resources to be allocated to the segment and assess its performance, and

(c) for which discrete financial information is available".

In consonance with IFRS 8 the 'Chief Operating decision maker' management approach, the company has reviewed its operating segments as follows. These have also been restated for prior periods.

Mobile Services (India & South Asia) - These services cover telecom services provided through cellular mobile technology in the geographies of India and South Asia. This

also includes the captive national long distance networks (erstwhile reported under Enterprise Services segment) which primarily provides connectivity to the Mobile Services business in India.

Mobile Services (Africa) - These services cover telecom services provided through cellular mobile technology in the African continent. This segment includes the businesses of the recently acquired Zain operations in Africa.

Telemedia Services - These services are provided through wire-line connectivity to retail and small business customers.

Enterprise Services - These services cover long distance services to third party international or domestic telecom service providers and internet broad-band/network solution services to corporate customers. (This segment previously included the captive national long distance networks which has now been reported under Mobile Services (India & South Asia)).

Passive Infra Services include setting up, operating and maintenance of communication towers for wireless telecom services provided both within and outside the group in and out of India.

Other Operations - These represent revenues and expenses, assets and liabilities for the group none of which constitutes a separately reportable segment. The corporate headquarters expenses are not charged to individual segments.

3.3 Consolidation of Joint Venture Results

Consequent to the adoption of IFRS w.e.f. April 1, 2010, the company has adopted 'Proportionate Consolidation' of Joint Ventures as per IAS 31 - Interest in Joint Ventures. As per Para 33, "The application of proportionate consolidation means that the statement of financial position of the venturer includes its share of the assets that it controls jointly and its share of the liabilities for which it is jointly responsible. The statement of comprehensive income of the venturer includes its share of the income and expenses of the jointly controlled entity."

The Company has proportionately consolidated the financial statements of Indus Towers Ltd. based on its equity interest in that company with effect from April 1, 2010 and for the comparable prior periods. Consequently Forty Two Percent (42%) of the Assets/Liabilities and Revenue/Expenses of Indus Towers Ltd. are reported in the consolidated books of Bharti Airtel Ltd. The impact of this consolidation on the erstwhile USGAAP results (based on 'Equity Consolidation' for Joint Ventures) for the financial Year 2009-10 has been disclosed separately on page 40.

SECTION 4

FINANCIAL HIGHLIGHTS

This section presents the (1) audited financial results for the first quarter ended June 30, 2009, and (2) audited financial results for the first quarter ended June 30, 2010 as per International Financial Reporting Standards (IFRS).

Detailed financial statements, analysis and other related information is attached to this report as Annexure (page 27 - 29). Also, kindly refer to Section 8 - use of Non - GAAP financial information (page 24) and Glossary (page 42) for detailed definitions.

SECTION 6

MANAGEMENT DISCUSSION AND ANALYSIS

6.1 India and South Asia

A. Key Industry Developments

1. 3G and BWA Auction:

During Apr-June, 2010 DoT has completed 3G and BWA auctions – First time in India.

3G - After 34 days (April 9, 2010 to May 13, 2010) and 183 rounds of 3G bidding, the Indian government has raised Rs. 67,719 crores from the 3G auction. Airtel, Aircel and Reliance each won spectrum in 13 service areas, Idea for 11 service areas, whereas Tata and Vodafone each have won spectrum in 9 service areas. Date of grant of spectrum is expected on September 1, 2010.

BWA - India's Broadband Wireless Access (BWA) spectrum auctions closed after 16 days (May 24, 2010 to 11 June, 2010) and 117 rounds of bidding. Among the winners Infotel (acquired later by Reliance Industries Ltd.) won for all 22 of India's service areas, Aircel won for 8 service area, Airtel and Qualcomm won for 4 service areas and Augere won for 1 service area. The Government has raised Rs. 38,543 crores from the BWA auction and spectrum was awarded on July 7, 2010.

2. Security Clearance

- DoT introduced a new security condition in Dec 2009 in the license agreement, making it mandatory for the service providers to apply for security clearance for all the equipments before placement of order.
- DoT has started issuing provisional clearances for some of the items lists submitted by the service providers and also denied clearance for certain equipments.
- Basis self certifications by service providers, June 2010 onwards DoT has started issuing the final approvals to service providers.
- Service providers who have got the final DoT approval have started procuring the equipment required for their networks.
- Further, DoT is in the process of finalizing a new agreement in consultation with the Industry which needs to be signed between all the service providers and their suppliers, covering various aspects of the overall security aspects of the country.

3. Mobile Number Portability

- The inter-operator testing is under progress to ensure a smooth launch.
- DoT has extended the timelines for implementation of MNP to October 31, 2010.

4. Subscriber Verification

- DoT has decentralized its powers to TERM Cells with respect to imposition of penalty on non-compliances observed through audits carried out on subscriber verification.
- Industry has raised concerns around this as this will question the transparency of the audit methodology.

- Industry has also written to DoT on other issues concerning the audits which have been outstanding for long. Majorly, the industry has been asking DoT to come out with a standard operating procedure for the audit carried out by TERM Cells so that the subjectivity / interpretation issues are removed thus making it a uniform and transparent audit. In addition, the industry has requested clarifications to be issued with respect to some documents allowed by DoT but being marked negative by TERM Cells due to interpretation apart from allowing some additional documents as proof of identity and address.
- DoT has sought views from the industry with suggestions on how the whole audit process can be strengthened so that there are no subsisting issues.

5. TRAI Recommendations on Spectrum Management & Licensing Framework

TRAI announced its recommendations to DoT on Spectrum Management and Licensing Framework on May 11, 2010. The key highlights of the recommendations are:

- The contracted spectrum will be 6.2 MHz / 5 MHz for GSM / CDMA respectively.
- All future licenses would be unified licenses and spectrum to be delinked from the license.
- A uniform license fee would be levied for UASL, CMTS, ISP and IP-I operators, which would be rationalized at 6% w.e.f. 2013-14.
- On renewal of license, 900MHz band to be replaced with 1800MHz band with equal amount of spectrum.
- 3G price should be adopted to determine the current price for 1800 MHz band. For 900MHz, it will be valued at 1.5 times of spectrum in 1800MHz band. TRAI is initiating the exercise to determine the current prices and would apprise the Government of its findings.
- Spectrum sharing to be allowed between 2 operators, who do not hold more than 4.4MHz.

B. Key Company Developments

- Bharti Airtel has become a global telecom operator by completing the acquisition of Zain Group's ("Zain") mobile operations in 15 countries across Africa for an enterprise valuation of US\$10.7 billion. With this acquisition, Airtel will become the first Indian brand to go truly global with a footprint that covers over 1.8 billion people. Bharti Airtel also becomes a major Indian MNC with operations in 18 countries across Asia and Africa with a customer base of over 183 million.
- Airtel won the 'Most Preferred Cellular Service Provider Brand' award in the CNBC Awaaz Consumer Awards 2010 for the 6th year in a row. The CNBC Awaaz Consumer Awards were based on an exhaustive consumer survey done by Nielsen. Over 3,000 consumers, spanning 19 cities and 16 states in India, rated brands across different

categories to choose brands which delivered true value for money.

- Bharti Airtel received the prestigious Business world

 FICCI-SEDF Corporate Social Responsibility Awards 2009-2010. The FICCI Socio Economic Development Foundation (FICCI-SEDF) and Business world CSR award was instituted in 1999 to recognize exemplary responsible business practices by the Indian Industry. Airtel joined the select list of companies like SAIL, Mahindra & Mahindra, Tata Chemicals, Tata Tea, Gujarat Ambuja Cements, Kinetic Engineering and Titan which have been recognized for their innovative programmes in the sphere of CSR.
- Bharti Airtel announced the appointment of Drew Kelton as President – Enterprise Services (India & South Asia). As President of the Enterprise Services unit, Drew's key focus would be to lead the transformation of the business to create a world class business-to-business (B2B) organization.
- Bharti Airtel unveiled Airtel Blog, World's first Voice Blogging service, enabling subscribers to create profiles and follow celebrities.
- Airtel Apps Central, India's first operator-driven mobile applications store, enabling subscribers to transform a basic phone into a Smart Phone. The application completed four months and clocked 13 million downloads.
- Airtel digital TV launched India's first High Definition (HD) box with Dolby Digital Plus offering 7.1 channels of surround sound for its customers.
- After its pioneering initiative of recording television programmes through mobile, Airtel also extended the recording facility through internet for its Digital TV recorder customers.
- Bharti Airtel announced the launch of its Hosted Contact Center services in partnership with industry leaders Servion and Cisco. Hosted Contact Center solutions are faster and less expensive to implement than customer premise-based contact centers and require no ongoing capital equipment or maintenance fee investment.

6.2 Africa

Key Industry Developments

Ghana

- In Apr 10, National Communications Authority (NCA), issued a draft policy statement on implementation of Mobile Number Portability (MNP) .The NCA has set June 2011, as the date for launch of MNP in Ghana. The NCA has set up a MNP steering group made up of representatives of all operators and would manage the implementation of MNP.
- On June 1, 2010, the Government of Ghana imposed a new tax of \$0.06 per minute on all incoming international calls. The Electronic Communications (Amendment) Act, 2009 (Act 786) prohibits operators

from increasing the charges of services to customers as a result of the increase in termination rate of international incoming traffic.

Nigeria

- The Nigerian Communications Commission (NCC) issued a public notice mandating the Registration of Telecommunications Subscriptions (RTS). As per this order operators are required to commence the registration of finger prints, on-site photo, residential address and occupation details for all new subscribers. The registration of the above details of existing subscribers commenced from August 1, 2010.
- The Nigerian Communications Commission (NCC) appointed KPMG Consultancy Services to develop the regulatory and technical framework for the implementation of Number Portability in Nigeria.
- The NCC has floated a proposal for the implementation of Number Portability Clearing House System and associated services.

Siera Leone

The National Telecommunications Commission (NATCOM) of Siera Leone had given a due date of June 30, 2010 for registration of all SIM cards sold by mobile operators in the country.

Kenya

- Airtel Kenya has been given additional Frequency Spectrum to enable it to offer 3G services to its customers, making it the second operator in the country after Safaricom to get the license.
- The Government of Kenya has issued a directive in June 2009 for mobile operators to register all subscribers on their network by collecting the identification details of all subscribers and storing their details. The Government had communicated the due date of July 31, 2010 for the registration of SIM cards failing which Mobile operators will be required to disconnect all unregistered SIM cards.
- The Communications Commission of Kenya (CCK) has appointed a consultant to carry out a study to determine universal service gaps. The study is intended to support the implementation of the universal service fund, which is a fund comprising of levies collected from all operators at the rate of 1% of annual gross revenues or lower.
- All operators will have the right to borrow funds from the universal service fund and to use to set up infrastructure in the identified areas.

Zambia

 In June 10, Government of Zambia has issued unified license to all its service providers which includes 3G Spectrum and International Service licenses. However, the old GSM license is yet to be migrated to new regime.

6.3 Results of Operations

The company has reported its (1) audited financial results for the quarter ended June 30, 2009; (2) audited financial results for the quarter ended June 30, 2010. The financial statements have been prepared in accordance with International Financial Reporting Standards (IFRS).

Key Highlights - For the guarter ended June 30, 2010

- Net addition of 46.4 million customers (Incl 36.4 mn customers of Africa)
- Total Revenues of Rs 122.3 billion (up 17% Y-o-Y).
- EBITDA before acquisition cost Rs 45.1 billion (up 5% Y-o-Y).
- EBITDA after acquisition cost Rs 44.1 billion (up 3% Y-o-Y).
- Cash profit from operations of Rs 39.9 billion (down 10% Y-o-Y).
- Net Income of Rs 16.8 billion (down 32% Y-o-Y).

Bharti Airtel Consolidated

Quarter ended June 30, 2010

Customer Base

As on June 30, 2010, the company had an aggregate of 183,371,520 customers consisting of 176,974,680 Mobile, 3,153,079 Telemedia and 3,243,761 Digital TV customers. Its total customer base as on June 30, 2010 increased by 71.3% compared to the customer base as on June 30, 2009.

Revenues/Turnover

During the quarter ended June 30, 2010, the company recorded revenues of Rs 122,308 mn, a growth of 17.4% compared to the quarter ended June 30, 2009. Revenues from mobile services represented 80.0% of the total revenues for the quarter ended June 30, 2010. Non-voice revenue contributed to approximately 14.7% of the total revenues for the quarter.

A.2.3 Bharti's Three Line Graph

The company tracks its performance on a three-line graph.

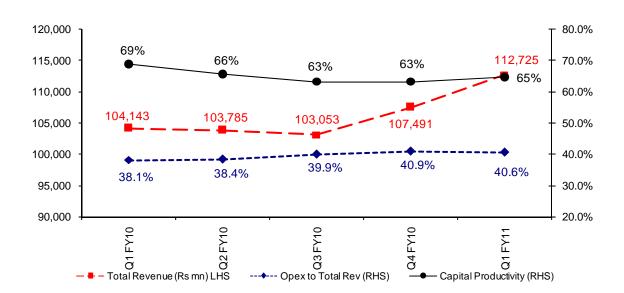

The parameters considered for the three-line graph are:

- 1. Total Revenues i.e. absolute turnover/sales
- р
- Opex Productivity operating expenses divided by the total revenues for the respective period. Operating expenses is the sum of (i) equipment costs (ii) employee costs (iii) network operations costs & (iv) selling, general and administrative costs. This ratio depicts the operational efficiencies in the company.

Given below is the graph for the last five quarters of the company:

3. Capital Productivity – this is computed by dividing revenue for the quarter (annualized) by gross cumulative capex (gross fixed assets and capital work in progress) till date i.e. the physical investments made in the assets creation of the company. This ratio depicts the productivity of assets of the company

The company believes that as long as the absolute revenues keep increasing periodically, opex productivity stabilizes or keeps coming down and capital productivity keeps improving, the company's overall financial health can be tracked.

Note 15: 3 line graph is based on Bharti Airtel (India & South Asia). The graph shown above is excluding Bharti Airtel African Operations as it is for less than one month in this quarter.

A.3 Key Accounting Policies as per IFRS

1. Joint Ventures

A joint venture is a contractual arrangement whereby the Group and other parties undertake an economic activity that is subject to joint control; that is, when the strategic financial and operating policy decisions relating to the activities require the unanimous consent of the parties sharing control.

The Group reports its interests in jointly controlled entities using proportionate consolidation. The Group's share of the assets, liabilities, income, expenses and cash flows of jointly controlled entities are combined with the equivalent items in the results on a line-by-line basis in the consolidated financial statements. The financial statements of the joint venture are prepared for the same reporting period as the parent company. Adjustments are made where necessary to bring the accounting policies in line with those of the Group.

Adjustments are made in the Group's consolidated financial statements to eliminate the Group's share of intra-group balances, income and expenses and unrealized gains and losses on transactions between the Group and its jointly controlled entities.

2. Property and equipment

Property and equipment are stated at cost, net of accumulated depreciation and impairment loss. All direct costs relating to the acquisition and installation of property and equipment are capitalized.

Depreciation is recorded on a straight-line basis over the estimated useful lives of the assets.

| Assets | Years |
|--|--|
| Building | 20 |
| Network Equipment | 3-20 |
| Computer equipment | 3 |
| Office, furniture and equipment | 2/5 |
| Vehicles | 5 |
| Leasehold improvements | Remaining period of Lease or 10 years whichever is less |
| Assets individually costing Rs. 5 thousand or less | 1 |
| Customer premises equipment | Over expected customer life |

Land is not depreciated. The assets' residual values and useful lives are reviewed, and adjusted if appropriate, at each balance sheet date.

Gains and losses arising from retirement or disposal of property and equipment are determined as the difference between the net disposal proceeds and the carrying amount of the asset and are recognized in the consolidated statement of comprehensive income on the date of retirement and disposal.

Costs of additions and substantial improvements to property and equipment are capitalized. The costs of maintenance and repairs of property and equipment are charged to operating expenses.

3. Goodwill

Goodwill arising on the acquisition of an entity represents the excess of the cost of acquisition over the Group's interest in the net fair value of the identifiable assets, liabilities and contingent liabilities of the entity recognised at the date of acquisition. Goodwill on acquisition of subsidiaries is disclosed separately. Goodwill arising on accounting for jointly controlled entities or entities in which the Group exercises significant influence is included in investments in the related associates/jointly controlled entities.

Goodwill is initially recognised as an asset at cost and is subsequently measured at cost less any accumulated impairment losses. Goodwill is held in the currency of the acquired entity and revalued to the closing rate at each date of statement of financial position. Goodwill is not subject to amortization but is tested for impairment annually and when circumstances indicate, the carrying value may be impaired Negative goodwill arising on an acquisition is recognised directly in the statement of comprehensive income.

On disposal of a subsidiary or a jointly controlled entity, the attributable amount of goodwill is included in the determination of the profit or loss recognised in the statement of comprehensive income on disposal.

Impairment is determined for goodwill by assessing the recoverable amount of each cash-generating unit (or group of cash-generating units) to which the goodwill relates. Where the recoverable amount of the cash-generating unit is less than their carrying amount an impairment loss is recognised. Impairment losses relating to goodwill are not reversed in future periods.

4. Foreign currency transactions

Monetary assets and liabilities denominated in foreign currencies are translated at the functional currency spot rate of exchange ruling at the reporting date. Non-monetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rates as at the dates of the initial transactions. Gains or losses resulting from foreign currency transactions are included in the consolidated statement of comprehensive income.

The assets and liabilities of foreign operations are translated into functional currency of parent (i.e INR) at the rate of exchange prevailing at the reporting date and their statements of comprehensive income are translated at average exchange rates prevailing during the period. The exchange differences arising on the translation are recognised in 'foreign currency translation reserve (FCTR)'. On disposal of a foreign operation, the component of FCTR relating to that particular foreign operation is recognised in the statement of comprehensive income.

5. Capital leases

Lessee accounting

Finance leases, which transfer to the Group substantially all the risks and benefits incidental to ownership of the leased item, are capitalised at the commencement of the lease at the fair value of the leased property or, if lower, at the present value of the minimum lease payments. Lease payments are apportioned between finance charges and reduction of the lease liability so as to achieve a constant rate of interest on the remaining balance of the liability. Finance charges are recognised in the statement of comprehensive income.

Amortization of leased assets is computed on straight line basis over the shorter of useful life of the assets or remaining lease poriod. Amortization charge for capital leases is included in depreciation expense for the period.

Lessor accounting

Assets leased to others under capital leases are recognized as receivables at an amount equal to the net investment in the leased assets. The finance income is recognized based on periodic rate of return on the net investment of the lessor outstanding in respect of the capital lease.

6. Indefeasible right to use (IRU)

The Group enters into agreements for leasing assets under 'Indefeasible right to use' with third parties. Under the arrangement the assets are taken or given on lease over the substantial part of the asset life. However the title to the assets and associated risks are retained by the lessor. Hence, such arrangements are recognized as operating lease. Direct expenditures incurred in connection with agreements are capitalized and expensed over the term of the agreement.

The contracted price is received in advance and is recognized as revenue during the period of the agreement. Unearned IRU revenue net of the amount recognizable within one year is disclosed as unearned income in non-current liabilities and the amount recognizable within one year as unearned income in current liabilities.

Exchange of network capabilities with other telecommunication service providers are recorded as non-monetary transactions and measured at the carrying amount of capacities relinquished, as these exchanges are for similar productive assets used to provide telecommunication services to customers.

7. Impairment of long – lived assets and intangible assets

The Group reviews its long-lived assets, including identifiable intangibles with finite lives, for impairment whenever events or changes in business circumstances indicate that the carrying amount of assets may not be fully recoverable. Such circumstances include, though are not limited to, significant or sustained declines in revenues or earnings and material adverse changes in the economic climate. For assets that the Group intends to hold for use, if the total of the expected future undiscounted cash flows produced by the asset or asset Group is less than the carrying amount of the assets, a loss is recognized for the difference between the fair value and carrying value of the assets. For assets the Group intends to dispose of by sale, a loss is recognized for the amount by which the estimated fair value, less cost to sell, is less than the carrying value of the assets. Fair value is determined based on quoted market prices, if available, or other valuation techniques including discounted future net cash flows.

8. Revenue recognition

(i) Service revenues

Service revenues include amounts invoiced for usage charges, fixed monthly subscription charges and VSAT/ internet usage charges, roaming charges, activation fees, processing fees and fees for value added services ('VAS'). Service revenues also include revenues associated with access and interconnection for usage of the telephone network of other operators for local, domestic long distance and international calls.

Service revenues are recognized as the services are rendered and are stated net of discounts, waivers and taxes. Revenues from pre-paid cards are recognized based on actual usage. Activation revenue and related activation costs, not exceeding the activation revenue, are deferred and amortized over their estimated useful life, which is consistent with the estimated churn of the related customers on a national life. The excess of activation costs over activation revenue, if any, are expensed as incurred. Subscriber acquisition costs are expensed as incurred. On introduction of new prepaid products, processing fees on recharge coupons is being recognized over the estimated customer relationship period or coupon validity period, whichever is lower.

Service revenues from the internet and VSAT business comprise revenues from registration, installation and provision of internet and satellite services. Registration fee and installation charges are deferred and amortized over their expected customer relationship period of 12 months. Service revenue is recognized from the date of satisfactory installation of equipment and software at the customer site and provisioning of internet and satellite services. Revenue from prepaid dialup packs is recognized on an actual usage basis and is net of sales returns and discounts.

Revenues from national and international long distance operations comprise revenue from provision of voice services which are recognized on completion of services while revenue from provision of bandwidth services is recognized over the period of arrangement.

Unbilled receivables represent revenues recognized from the bill cycle date to the end of each month. These are billed in subsequent periods based on the terms of the billing plans.

Unearned income includes amounts received in advance on pre-paid cards and advance monthly rentals on post-paid. The related services are expected to be performed within the next operating cycle.

(ii) Equipment sales

Equipment sales consist primarily of revenues from sale of VSAT and internet equipment (hardware) and related accessories to subscribers. Equipment sales are treated as activation revenue and are deferred and amortized over the customer relationship period.

(iii) Multiple element arrangements

The Group has entered into certain multiple-element revenue arrangements. These arrangements involve the delivery or

performance of multiple products, services or rights to use assets including VSAT and internet equipment, internet and satellite services, set top boxes and subscription fees on DTH, indefeasible right to use and hardware and equipment maintenance. The Group evaluates all deliverables in an arrangement to determine whether they represent separate units of accounting at the inception of the arrangement in accordance "Revenue Arrangements with Multiple Deliverables" applying the hierarchy in IAS 8.12.

Revenue is determined for each of the units of accounting on the basis of their fair values Arrangements involving the delivery of bundled products or services shall be separated into individual elements, each with own separate revenue contribution. Total arrangement consideration related to the bundled contract is allocated among the different elements based on their relative fair values (i.e., a ratio of the fair value of each element to the aggregated fair value of the bundled deliverables is generated). Where the Group has determined that the fair value of individual element is not ascertainable, equipment sales for these these arrangements are deferred and amortized over the term of the arrangement.

9. License fees

Acquired licenses are shown at historical cost. Licenses acquired in a business combination are recognized at fair value at the acquisition date. License and spectrum entry fees are measured at cost less accumulated amortization. Amortization is charged to the statement of comprehensive income on a straight-line basis over the period of the license from the date of commencement of commercial operations in the respective jurisdiction and is disclosed as components of depreciation and amortization. The amortization period is determined primarily by reference to the unexpired license period.

Group's shares of licenses acquired under business combination are accounted for at their respective fair values as at the date of acquisition. The amounts are amortized on a straight-line basis over the remaining period of the license from the date of acquisition of respective circles.

The revenue-share fee on license and spectrum is computed as per the licensing agreement and is expensed as incurred.

10. Other intangible assets

Other intangible assets comprising enterprise resource planning software, bandwidth capacities, brands, customer relationships, distribution networks, licenses and non-compete clauses, are capitalized at the Group's share of respective fair values on the date of an acquisition. Amortisation is charged to the statement of comprehensive income on a straight-line basis over the estimated useful lives of intangible assets from the date they are available for use or placed in service. The intangibles are amortised as follows:

- Software is amortized over the period of its license, not exceeding three years. Software upto Rs. 500 (thousand) is written off in the year placed in service.
- Bandwidth capacities are amortized over the period of the agreement subject to a maximum of 18 years.
- Brand: Over the period of their expected benefits, not exceeding the life of the licenses and are written off in their entirety when no longer in use.
- Distribution network : Over three years

- Customer base: The estimated life of such relationships.
- Non-compete clause: Over the remaining period of license.

11. Income-taxes

Income tax assets and liabilities for the current and prior periods are measured at the amount expected to be recovered from or paid to the taxation authorities, and is provided using the liability method on temporary differences at the reporting date between the tax bases of assets and liabilities and their carrying amounts for financial reporting purposes. Deferred tax liabilities are recognised for all taxable temporary differences, except:

- Where the deferred tax liability arises from the initial recognition of goodwill or of an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the accounting profit nor taxable profit or loss.
- In respect of taxable temporary differences associated with investments in subsidiaries, associates and interests in joint ventures, where the timing of the reversal of the temporary differences can be controlled and it is probable that the temporary differences will not reverse in the foreseeable future.

The tax rates and tax laws used to compute the amount are those that are enacted or substantively enacted, by the reporting date, in the countries where the Group operates and generates taxable income.

12. Borrowing costs

Borrowing costs directly attributable to the acquisition, construction or production of an asset that necessarily takes a substantial period of time to get ready for its intended use or sale are capitalised as part of the cost of the respective assets. The interest cost incurred for funding a qualifying asset during the construction period is capitalized based on actual investment in the asset at the average interest rate. All other borrowing costs are expensed in the period they occur. Borrowing costs consist of interest and other costs that the Group incurs in connection with the borrowing of funds.

13. Derivative financial instruments

The Group enters into derivative instruments, including interest rate swaps and foreign currency forward contracts, to manage interest rate movements of its debt obligations and foreign currency exposures related to the import of equipment used in operations and its foreign currency denominated debt instruments.

All derivative instruments are recorded on the balance sheet at their fair value. Changes in the fair value of derivatives are recorded each period in current earnings or in other comprehensive income, depending on whether a derivative is designated as part of a hedging relationship and, if it is, depending on the type of hedging relationship.

14. Asset Retirement Obligations

Asset retirement obligations (ARO) are provided for those operating lease arrangements where the Group has a binding

obligation at the end of the lease period to restore the leased premises in a condition similar to inception of lease. ARO are provided at the present value of expected costs to settle the obligation using discounted cash flows and are recognised as part of the cost of that particular asset. The cash flows are discounted at a current pre-tax rate that reflects the risks specific to the decommissioning liability. The unwinding of the discount is expensed as incurred and recognised in the statement of comprehensive income as a finance cost. The estimated future costs of decommissioning are reviewed annually and adjusted as appropriate. Changes in the estimated future costs or in the discount rate applied are added to or deducted from the cost of the asset.

15. Allowance for uncollectible accounts receivable

The allowance for uncollectible accounts receivable reflects management's best estimate of probable losses inherent in the

accounts receivable balance. Management primarily determines the allowance based on the aging of accounts receivable balances and historical write-off experience, net of recoveries. The Group provides for amounts outstanding net of security deposits, or in specific cases where management is of the view that the amounts are not recoverable. Amounts due from debtors that have been outstanding, though fully provided, are evaluated on a regular basis by the management and are written off, if as a result of such evaluation, it is determined that these amounts will not be collected.

16. Issuance of Stock by Subsidiaries

At the time a subsidiary sells its stock to unrelated parties at a price less than or in excess of its book value, the Company's investment in that subsidiary's net assets changes. The Company's policy is to record such changes in its Consolidated statement of changes in equity.

A.4 Reconciliation between IFRS & USGAAP

GLOSSARY

Technical and Industry Terms

| Company Related | |
|--|---|
| ARPU (for Mobile and Telemedia Services) | Average revenue per customer per month is computed by: dividing the total revenues, excluding equipment sales during the relevant period by the average customers; and dividing the result by the number of months in the relevant period. |
| ARPM (Average Rate Per Minute) | Average Rate Per Minute is computed by: Dividing the total revenues by total minutes. |
| Asset Turnover | Asset Turnover is defined as total revenues, for the preceding (last) 12 months from the end of the relevant period, divided by average assets. Asset is defined as the sum of non current assets and net current assets. Net current assets are computed by subtracting current liabilities from current assets. Average assets are calculated by considering average of quarterly average for the preceding (last) four quarters from the end of the relevant period. |
| Average Minutes of Use per user | Average minutes of usage per customer per month is calculated by dividing the total minutes of usage (incoming, outgoing and in-roaming) on our network during the relevant period by the average customers; and dividing the result by the number of months in the relevant period. |
| Average Sharing Operators | Average Sharing Operators are derived by computing the average of the monthly average sharing operators for the relevant period |
| Average Customers | Average customers are derived by computing the average of the monthly average customers for the relevant period. |
| Average Towers | Average towers are derived by computing the average of the monthly average towers for the relevant period |
| bn | Billion |
| Book Value Per Equity Share | Total stockholder's equity as at the end of the relevant period divided by issued and outstanding equity shares as at the end of the relevant period. |
| Capital Employed | Capital Employed is defined as sum of equity attributable to equity holders of parent and net debt. |
| Cash Profit From Operations | It is not a IFRS measure and is defined as operating income adjusted for depreciation and amortization, pre-operating costs, interest expense and interest income. |
| Churn | Churn is calculated by dividing the total number of disconnections during the relevant period by the average customers; and dividing the result by the number of months in the relevant period. |
| Customers Per Employee | Number of customers on networks of a business unit as at end of the relevant period divided by number of employees in the respective business unit as at end of the relevant period. |
| DTH | Direct to Home broadcast service |
| Earnings Per Basic Share. | It is computed by dividing net income attributable to ordinary shareholders by the weighted average number of ordinary shares outstanding during the period. |
| | The calculation of Net Profit/ (loss) per diluted share adjusts net profit or loss and the weighted average number of ordinary shares outstanding, to give effect to all dilutive potential ordinary shares that were outstanding during the year. |
| Earnings Per Diluted Share | Net profit or loss attributable to ordinary shareholders is adjusted for the after-tax effect of the following: (1) dividends on potential ordinary shares (for example, dilutive convertible preferred shares); (2) interest recognized on potential ordinary shares (for example, dilutive convertible debt); and (3) any other changes in income or expense resulting from the conversion of dilutive potential ordinary shares (e.g., an entity's contribution to its non-discretionary employee profit-sharing plan may be revised based on changes in net profit due to the effects of items discussed above). |
| EBITDA | Earnings/ (loss) before interest, taxation, depreciation and amortization. It is not a IFRS measure and is defined as operating income adjusted for depreciation and amortization and pre-operating costs. |
| EBITDA Margin | It is computed by dividing EBITDA for the relevant period by total revenues for the relevant period. |
| EBIT | Earnings / (Loss) before interest, taxation for the relevant period. |

| Gross Revenue per Employee per month | It is computed by dividing the Gross Revenue (net of inter-segment eliminations) by the closing number of employees in a given business unit and number of months in the relevant period. |
|---|--|
| ILD | International Long Distance Services. |
| Profit / (Loss) after current tax expense | It is not a IFRS measure and is defined as Profit / (Loss) before taxation adjusted for current tax expense. |
| Interest Coverage Ratio | EBITDA for the relevant period divided by interest on borrowing for the relevant period. |
| Investments in projects | The investment in projects comprises gross fixed assets, intangible assets, capital work in progress, gross goodwill, investment in JV's and one-time entry fee paid towards acquisition of licenses. |
| ICT | Information Communication Technology |
| IPTV | Internet Protocol TV. IPTV is the method of delivering and viewing television programmes using an IP transmission and service infrastructure, which can deliver digital television to the customers. IPTV when offered using an IP network and high speed broadband technology becomes interactive because of availability of return path and is capable of providing Video on Demand (VOD), time shifted television and many other exciting programmes. |
| LTM | Last twelve months. |
| Market Capitalization | Number of issued and outstanding shares as at end of June 30, 2010 multiplied by closing market price (BSE) as at end of June 30, 2010. |
| mn | Million |
| MoU | Minutes of Usage. Duration in minutes for which a customer uses the network. It is typically expressed over a period of one month. |
| Network Site | Comprises of Base Transmission System (BTS) which holds the radio transreceivers (TRXs) that define a cell and coordinates the radio links protocols with the mobile device. It includes all the Ground based, Roof top and In Building Solutions as at the end of the period. |
| Net Debt | It is not a IFRS measure and is defined as the long-term debt, net of current portion plus short-term borrowings and current portion of long-term debt minus cash and cash equivalents, restricted cash, restricted cash non-current, short-term investments and investments as at the end of the relevant period. |
| Net Debt to EBITDA | It is computed by dividing net debt as at the end of the relevant period by EBITDA for preceding (last) 12 months from the end of the relevant period. |
| Net Debt to Funded Equity Ratio | It is computed by dividing net debt as at the end of the relevant period by Equity attributable to equity holders of parent as at the end of the relevant period. |
| Net Revenues | It is not IFRS measure and is defined as total revenues adjusted for access charges for the relevant period. |
| NLD | National Long Distance Services. |
| Non Voice Revenue as a % of consolidated revenue | It is computed by dividing the total non-voice revenue of the company (consolidated) by the total revenues for the relevant period. Non-voice revenues include VAS Revenues for Mobile, VAS and Internet Revenues for Telemedia Services and Bandwidth and Internet Revenues for Enterprise Services. |
| Non Voice Revenue as a % of Mobile Revenue | It is computed by dividing the total non voice revenue of mobile services by the total revenues of mobile services for the relevant period. Non voice revenue for mobile services includes revenues from value added services (including SMS, GPRS, MMS, Ring Back Tones etc.). |
| Return On Capital Employed (ROCE) | For the full year ended March 31, 2007, 2008, 2009 and 2010. ROCE is computed by dividing the sum of net profit and finance cost (net) for the period by average (of opening and closing) capital employed. For the quarterly computation, it is computed by dividing the sum of net profit and finance cost (net) for the preceding (last) 12 months from the end of the relevant period by average capital employed. Average capital employed is calculated by considering average of quarterly average for the preceding (last) four quarters from the end of the relevant period. |
| Return On Equity attributable to equity holders of parent | For the full year ended March 31, 2007, 2008, 2009 and 2010, it is computed by dividing net profit for the period by the average (of opening and closing) Equity attributable to equity holders of parent. For the quarterly computations, it is computed by dividing net profit for the preceding (last) 12 months from the end of the relevant period by the average Stockholder's equity for the preceding (last) 12 months. Average Stockholder's equity is calculated by considering average of quarterly average for the preceding (last) four quarters from the end of the relevant period. |

| SA Sharing revenue per Sharing Operator per month | South Asia It is computed by dividing gross revenue less energy and other pass through, from Passive Infrastructure services by average sharing operators. |
|--|--|
| Sharing factor | It is computed by dividing average sharing operators by average towers |
| Total Towers | It is the sum of ground based towers, roof top towers and others. |
| Total Operating Expenses | It is defined as sum of equipment costs, employee costs, network operations costs and selling, general and administrative cost for the relevant period. |
| Underlying EBITDA Margin | It is calculated by dividing EBITDA before acquisition related costs for the relevant period by the Total Revenues for the relevant period. |
