REIMAGINE HOW YOUR BUSINESS WORKS

GET AIRTEL PUBLIC CLOUD POWERED BY AWS

IS YOUR DIGITAL TRANSFORMATION JOURNEY
DRIVING BUSINESS OUTCOMES?

It's not enough to simply adopt digital tools; they should be enablers for your ongoing business success.

Frequently, organisations face the challenge of finding the right domain expertise across applications, infrastructures and networks.

To truly achieve a seamless and impactful digital transformation, you need a trusted partner with skillset and experience to not only understand the technology landscape, but also understand your business needs to drive business outcomes beyond SLAs.

Airtel enables your organisation to navigate its digital transformation journey, through its deep expertise and integrated products across connectivity, AWS Cloud, security, data centres, and enterprise ecosystem. Our proven experience and partnerships are essential factors for your digital-first strategy with a high-level focus on business outcomes.
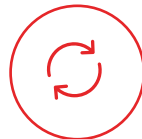

AIRTEL AND AWS: THE PERFECT PARTNERSHIP FOR YOUR BUSINESS GROWTH

Airtel's strategic collaboration with AWS aims to help enterprises design and build business solutions for improved application availability across a highly resilient network.
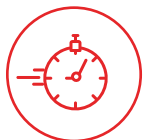

AT AIRTEL, WE FOCUS ON OUTCOMES, AND OFFER YOU OUR EXPERTISE TO ENSURE:

CUSTOMER-FOCUSED PRODUCTS

PRESCRIPTIVE AND RAPID TRANSFORMATION APPROACH

FASTER TIME TO MARKET

COST OPTIMIZATION

IMPROVED RELIABILITY AND AVAILABILITY

ENTERPRISE-GRADE SECURITY

OUR **THREE-PILLAR APPROACH**

CLOUD CONSULTATION AND ASSESSMENT

Airtel enables to accelerate your cloud journey by helping you design, architect, build, migrate, and manage workloads and applications on the AWS cloud. Our outcome-oriented approach is backed by our adoption of the best practices, frameworks, and tools.

AWS-DRIVEN DIGITAL TRANSFORMATION

Focus on driving business growth while we take on the responsibility of building, installing, and configuring everything you need across the AWS cloud ecosystem including compute power, database storage, content delivery, migration to cloud, Windows & SAP Enterprise applications on Cloud, IoT, Big Data & Analytics.
